

org.apache.commons.math.distribution.  
NormalDistributionImpl.NormalDistributionImpl

```
graph LR; A["org.apache.commons.math.distribution.  
NormalDistributionImpl.NormalDistributionImpl"] --> B["org.apache.commons.math.distribution.  
NormalDistributionImpl.setMean"]; A --> C["org.apache.commons.math.distribution.  
NormalDistributionImpl.setStandardDeviation"];
```

The diagram illustrates a class hierarchy or method lookup. A central box on the left, representing the class `org.apache.commons.math.distribution.NormalDistributionImpl`, has two arrows pointing to the right. The top arrow points to a box representing the `setMean` method, and the bottom arrow points to a box representing the `setStandardDeviation` method. Both target boxes are aligned to the right of the central box.
