

org.apache.commons.math.distribution.
BinomialDistributionImpl.BinomialDistributionImpl

```
graph LR; A["org.apache.commons.math.distribution.  
BinomialDistributionImpl.BinomialDistributionImpl"] --> B["org.apache.commons.math.distribution.  
BinomialDistributionImpl.setNumberOfTrials"]; A --> C["org.apache.commons.math.distribution.  
BinomialDistributionImpl.setProbability  
OfSuccess"];
```

The diagram illustrates the relationship between a class and its methods. A central box on the left, representing the class `org.apache.commons.math.distribution.BinomialDistributionImpl`, has two arrows pointing to the right. The top arrow points to a box containing the method `org.apache.commons.math.distribution.BinomialDistributionImpl.setNumberOfTrials`. The bottom arrow points to a box containing the method `org.apache.commons.math.distribution.BinomialDistributionImpl.setProbabilityOfSuccess`.
