

Exception

```
graph BT; MathException["org.apache.commons.math.MathException"] --> Exception
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Exception'. Below it is a box labeled 'org.apache.commons.math.MathException'. A blue arrow points from the 'MathException' box up to the 'Exception' box, indicating that 'MathException' inherits from 'Exception'.

org.apache.commons.math.  
MathException
