

org.apache.commons.math.distribution.
PoissonDistributionImpl.PoissonDistributionImpl

```
graph LR; A[org.apache.commons.math.distribution.PoissonDistributionImpl.PoissonDistributionImpl] --> B[org.apache.commons.math.distribution.PoissonDistributionImpl.setNormal]; A --> C[org.apache.commons.math.distribution.PoissonDistributionImpl.setMean];
```

The diagram illustrates a class hierarchy or method lookup. A central box on the left, representing the class `org.apache.commons.math.distribution.PoissonDistributionImpl.PoissonDistributionImpl`, has two arrows pointing to the right. The top arrow points to a box containing the method `org.apache.commons.math.distribution.PoissonDistributionImpl.setNormal`. The bottom arrow points to a box containing the method `org.apache.commons.math.distribution.PoissonDistributionImpl.setMean`.

org.apache.commons.math.distribution.
PoissonDistributionImpl.setNormal

org.apache.commons.math.distribution.
PoissonDistributionImpl.setMean
